# MRS. ROWLAND T. BURNS

AT AGE OF 79, THIS GOOD WOMAN 18 CALLED TO HER REWARD.

died about four o'clock on Tuesday no more forever ber morning last. Two of the children, shrined in our hearts. Mrs. L. S. Johnson, of Frankfort, Ky., and Mrs. C. H. Williamson, of Mem-, Tenn., were not present when devoted mother breathed her last. Mrs. Burns illed of a complication of diseases, made incurable by the infirmlty of advanced age. She had many improvements and many relapses daring her protracted sickness, more than once being considered to be at the point of death, but a raily would come and her family and friends would become hopeful. During the long suffering Mrs. Hurns was not niways confinod ta her bed or even to the house. On Go-To-Sunday School day, in April last, she was carried to the Court House and it was thought the journey did her harm. This was her hast guing on the street. For some time she had not been able to leave her bed, consciousness during the night, re-maining so until ilenth closed the scene. She died pescefully and without a Taylor aml Mr. Clyde Scaggs, Mlso struggle or a sigh. Funeral services Mona Terrell and Mr. Homer H. Mar-Were held Thursday afternoon, conducted at the house by the Rev. L. E. McEldowney, poster of the M. E. Church, South. Who Die In The Lord."
Yea, verily, and thrice blessed is the saintly woman, who, in the early down of a chill November day, opened hereves upon the bright scenes of the literature. She had lived many, many years as she died in the Lord, the Lord she loved and served, quietly, fruitfolly, undoubtingly, iters was the faith that Whittier most have felt and had in mind when he wrote.

"I know not where this isbinds lift Their frouded pains in sir:

This simple, ublding faith in her God caupled with the love and devotion of husband of more than half a century was her support during hours of tryin ordeals, and in pain and suffering such as poor humanity is not often called to endure. And through it all she never murmured nor replined.

Mrs. Caroline Hurns was one of th most beautiful characters any community ever knew. To mention all her poble and endearing traits of character would be a delightful but dillicult task, and to those who did not know it might he deemed exaggeration, but many who read this feeble tribute to the saintly woman knew that it is not an easy thing to speak in terms of ealogy of one whose life was indeed blnmeless Her many virtues spake for themsoul bore no mark of soil, nor stain of Jefferson he had 35 cents left. Hy in-sin. She was a most unselfish woman, dustry and economy he fared well, bebut little for anything except for her friends and neighbors, Her life a daughter, was given to good works. # BUSINESS CONDITIONS ARE NOW EXCELLENT

BOTH FOREIGN AND DOMESTIC **DEMANDS ARE VERY** HEAVY.

New York, November 14 .-- While the greatest trade activity is still being seen in orders from abroad, domestic country. Husiness enterprise has lost its timidity and expansion is in progress. Some fears have been expressed lest a change in political randitions abroad might bring about some reac-tion but, as a rule, optimism prevails on every side,

in all discussions relating to different branches of trade, whether domestic or external, the dominant factor s always the great conflict abroad. At the outset the principal things that gone to press, operated on for appen-claimed attention were those growing dicitis. He was also suffering with oat of restricted imports and of the peritonitis, and for several days he ability to produce and send across the was in very bad shape. However, he seas what the belligerents required, is now doing very well and has a good Recently it has become necessary to chance for recovery. Dr. York, assistnote more particularly the reflex action on home conditions of a one-sided gambili, performed the operation.

Gambili, performed the operation.

Ars. Goble, who had been ill of tytrade, accompanied by feverish activity in a number of large industries, the establishment of new ones to make things hitherto brought in from abroad and a picthora of bank resources for exceeding all possible business requirements.

One of the first effects of the new conditions has been to overcome the economical tendencies which had al-most become fixed since the 1907 panic. finade by the farmers and miners have helped to give a remarkable impetus to retail buying which, in turn, has extended to the primary markets. The increase in demand and broadening of purchases have had their natural effect in raising prices in things to wear and things to eat in such a manner that every one in this country has felt the effects of a struggle thoasands of miles away.

Lessons in War Demand. it is generally recognized that the manufacturing enpacity of the ludustrial plants in this country is much in excess of the needs of the population. The excess varies in different lines, but E. Church, Sauth, when a child, was converted when ten years old, and was married to Rowland T, Hurns July 8, 1868. Died Nov. 16, 1915 at 4 o'clock The Wood Oil Co., bave their power on reduced time at different persons why plants are shut down or The Wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or The Wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run on reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run or reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run or reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run or reduced time at different persons why plants are shut down or the wood Oil Co., bave their power run or reduced time at different persons why plants are shut down or the wood Oil Co. plant installed on the Middle Fork of lods. If an outlet in the foreign licht could be provided for the excess production under normal conditions, such as the prevalence of the war now af-fords, the effects would be great in

divers directions. The present experiences show what has been demonstrated before, and over again, that economy and efficiency are both furthered when man-afacturing plants are run continuous ly and at capacity, thit everhead charges are lessened in such a case, and the labor of men becomes more productive, it is also possible to keep intact the most efficient forms of or-ganization, as well as to purchase suppiles advantageously for future needs. With the present productive capacity of the domestic plants it is absolutely necessary that foreign trails be had in order to find a market for the surpho n order that those plants shall run at their maximum of economy

If this is accomplished it will mean that American manufactured products, whether they be of the metals or textiles, will be produced much cheaper and this ought to result in their being able to meet better any competition abroad with similar products from for eign countries. By lopping off certain trade evils which have been a great handleap to the profitable operation of many kinds of milis and factories, and by an intelligent pursuit of foreign trade, it may yet be discovered that necessary costs of production here are little, if any, in excess of those which have prevalled abroad, and may prove to be less than those which must be case after the war in the countries of the belligerents.

Here is another just-elected member afthe Prince Albert old-time jimmy-pipers club." This is John O'Reilly, of East Providence, R. I., who has just passed the century mark. Mr. O'Reilly is one af those grand old men who has come to this ripe as with the joys of his friendly jimmy prefresh in his mind each morning. He has always been a liberal amoker.

Prince Albert is sold everywhere because the demand far it is universal. So wherever you happen to run whart just drop in the handiest shop that'sells tobacce and buy the tappy red bag for a jitney piece, 5c; tidy the tin, 10c; handsome pound and half-peand tin hamidors; and that classy crystal-glass seand humider not be provincemaistans top.

You be a sport and take a chance on this say-so, because you've no idea of the bully goodness, of the joy'us satisfaction, of the contentment and restfulness and that sort of thing, that hits every man who gets chummy with P. A.

Hammer this home for what ails your smokeappetite, because you've no time to lose getting introduced to this real and true man-tobacco that's ace-high and a yard wide no matter how you swing on it, jimmy pipe or makin's cigarette!

Blue to Hava Detectives on Train.

Charleston, W. Va., Nov. 11 .- Fred O. Blue, commissioner of prohibition innounced today that he has arranged to have deputies on all passenger trains running into West Virginia from cities lie which saloons are located for the purpose of keeping acquainted with every person who brings liquor into the state, Mr. Ithie said that the statistics will be kept in his department and that ns soon as any person transports into his territory more than a reasonable quantity of intoxicants, he will be considered as a bootlegger and be arrested as such.

West Virginia As a Farming State.

On account of the large interests in timber snil minerals in West Virginiu the general impression prevnils that the farming interests of the state do not amount to much. This is a great mistake as is shown in government statistics. West Virginia has more than \$45,000,000 worth of domestic nnimals and poultry; of horses and mules she has 179,793 head, worth close to \$20,-000,000. She has 616,557 head of cattle worth \$16,000,000; 325,000 head of hogs, worth \$2,000,000; 906,093 sheep and lambs, worth \$3,000,000 and 3,310,155 head of poultry, worth \$1,628,700.

The fruit industry is adding millions to the incomes of West Virginia farmers. Kentucky is famed as a blue grass; yet West Virginiu has n greater territory sdapted to hive grass than has Kentucky. These and a thousand other things regarding the state should be known to West Virginians. It would make them better contented with their atate and hetter farmers and live stock

They also know a little giv-Ills of society'.

'Aias for him who never sees

of him who indulges it. There is no other point at which man is so fearfully and wanderfully made. The thought that the seeds of destiny may be floating about like thistiedown in the at-

hopefulness. The rational optimist is not a man who sees things as they are not; but who, seeing them as they are refuses to let the clouds of an hour settls so thick upon his course as to shut out the radiant realm where the sun is always shining. He knows that the sun is older and a thousand times more powsrful than the clouds, which are made of the mist and come and go at the sun's commund. He knows that the day wus not made for the night, but the night for the day; that the dark-ness and slumber of the night are but means to the greater ends which the day will accomplish.

One of the noblest and most vuluable prerogatives of man is that of detsrin-ining for himself what view of lifs shall underlie his character and course of life. This determination is complex, of course. Many elements enter into It which it might prove interesting to discuss here, if the space allowed, but what I started out to say is this; that every young person can cultivate what may be preperly called the habit of ap-preciation and thereby throw into his own life and that of others a multi-tude of pleasures and even of powers the presence of which will redeem the lif from what is often regarded as its necessary gloom.

Let us note, then, what appreciation is not and what it is. To appreciate is not merely to estimate or place a proper value upon persons or conditions of ar value upon persons or conditions or things. On the other hand, it is not to esteem, as we oftentimes esteem, per-sons without any rigid consideration of their value. But it partakes of the na-ture of both. It implies a right valua-tion as im act of judgment and also a sense of enjoyment in the form of a feeling of commendation. There may be, however, an appreciation of things in no sense enjoyable, but always noble or emobling. Men appreciate dangers and difficulties—that is, they properly value the magnitude of these and experience an emotional effect which corresponds with them. But appreciation has reference, in the main, to things enjoyable; and when we turn to these, how manifold and great are the sources of our enjoyment. We have come again to that period of the year which has been agreed upon us our seasoo of special thanksgiving. This is America's feast of tabernacies, the time of in-gathering and rest, of household re-unions, and of befitting acknowledg-ment of the blessings which Jehovsh has showered upon us and upon our nation. The man who has cultivated the habit of depreciation will see only the spots on the sun of our prosperity, but he whose mind and heart are open to the beautiful and good will be filled with a sense of generous pleasure and be morally uplifted us he recounts thu mereles that have crowned the year. While aearly all of Europe is engulfed in the most desolating war the world ever saw, we are at peace with all man-klod, and our affairs are in the hands of men who are clod-fearing and peace-loving, and we are safe. We are also blessed with an abundance of resources, so that we are full and have much to spare to others. The horn of plenty is the fitting symbol of our prosperity Our government authorities assure us that, despite the perturbed state of husiaess on account of the war, the trade balance shows that in the fiscayear just closed we have received a thousand millions of dollars more from the things we have sent abrond than we have paid for the things we have imported. We are nlso blessed with geaniae liberty. We are free from the desolating war burdens which are grind ing the life out of many other lands. Hut even more than that, every Americun citizen is free to pursue according to his own choice all the ends of bustaess and pleasure that are worthy of fair and hacorable men.

But great us are our material and civic blessings, there are others still higher in which we do well to rejoice and be glud. We are in traditional and present possession of lofty ideals of individual, community, and autional life, bit is "jumped," stand still. If the Amidst all the materialism of our time inound is any good and the rabbit does there is ever an which is truly Christian and altraistic White fally disposed to take proper care of ourselves, we stand ready to be the servants of others, Although we appreciate duly the billion-dollar halance of trade, there are many who rejoice vastly more in the millions which have been sent abroad to relieve the hunger of strangers and to bind up their wounds, and in the hnadreds of ly always runs up hill. That's because millions which at home and abroad his rear legs are much stronger than have been devoted to the intellectual his front legs.

and spiritual enlargement of men, in if light snow has fallen the night be so far as our own land is concerned w have no roason to doubt that the world moves forward into the light, while the number and greatness of our providential blessings constrain us to say: "The Lord of hosts is with us; the God of Jacob ls our refuge."

## THE HOME CIRCLE AND ITS INTERESTS.

#### Column Dedicated to Tired Mothers as They Join The Home Circle at Evening Tide.

The old homestead is all alive today Father and mother have been antici-pating for nearly the entire month Day by day some little preparation na-been going on, until there seems nothing more to do but to wait. It is very quiet on Thanksgiving day morning Grandma stirs around lively but silently. Occasionally a tear steals down her sheek as she fixes the places around the table. Just as many paces as last year, but one less to fill them. Then omes grandpa, and she brushes away the tear and in a moment the dear sweet face is lit up with smiles. They'll soon be here, grandma, and the house will not he so still. Yes, there they are, Jim and Jennie, little Madge and Charlie the sweet little fellow; and there is John and Mary with the four children -my, how they've grown. Frank is almost as tall as his papa and Kate-I declare half a head taller than he mother. Come in, come in, heaven bless you, children! The silence of the old home is broken and gives place to merriment as in days agone because Thanksgiving time is here. The above but a brief pleture sketched of hundreds of American homes today because it is Thanksglving.

many changes, and many of them sad anes. Yet blessings of sunshine have fallen as well as the tears from tho clouds. It is not best to live in the past, whatever it bo. Better gather up the sunshine of the present, or let the hope for better things add a mite of comfort for today. If there is much to make you sad, lose yourself in seeking to cheer another's heart, and make those around you glad. It is always helpful to think of others rather than yourself. The greatest sorrow of any heart can find alleviation in minister-ing to others. Real life is to minister wather than to be ministered unto. Give cheer and you'll get cheerful. Bo thankful and give praise and rejoicing will all your soul. Sing the snatch of a song and the sunbeams will play about you.

Be mindful of all this and Thanksgiving Day'will be a day of Thanksgiving until Thanksgiving Day again.

We have made of Thanksgiving a day of gratitude all untrammeled, a

## Advice of Mother no Doubt Prevents Daughter's Untimely End.

Ready, Ky.—"I was not able to do anything for nearly six months," writes Mrs. Laura Bratcher, of this place, "and was down in bed for three months.

I cannot tell you how I suffered with my head, and with nervousness and womanly troubles.

Our family doctor told my husband he could not do me any good, and he had to give it up. We iried another doctor, but he did not help me.

At last, my mother advised me to take Cardui, the woman's lonic. I thought it was no use for I was nearly dead and nothing seemed to do me any good. But I took eleven bottles, and now I am able to do ail of my work and my own washing.

I think Cardul is the best medicine in the world. My weight has increased, and I look the picture of health."

If you suffer from any of the ailments peculiar to women, get a bottle of Cardui loday. Delay is dangerous. We know it will help you, tor it has helped so many thousands of other weak women in the past 50 years. At all druggists.

day the accompaniments of which are merry as they should be. The reunion of families and of friends the feasting and the laughter, even the legend of the eunobled American hird, all combine to make of the day something genuine and religiously beautiful. There is the strain of the Timbrel. Never was a greater national holida ne er one more perfect in its spirit. It is in itself one of the things to be thankful for to the Power which has so tlessed so vast a and,

It cannot be that earth is man's only abiding place. It cannot be that our life is a bubble cast up by the ocean if eternity to float a moment upon its waves and sink into nothingness. Else, why is it the high and glorlous aspirations which leap like angels from the temple of our hearts are forever wan dering unsatisfied? Why is it that the ralnbow and cloud come over us with a beauty that pass off and leave us to muse of their loveliness? Why is it that the stars which hold their festival around the midnight throne are set above the grasp of our limited facuities forever mocking us with their un approachable glory? And finally, why is it that the bright forms of human beauty are presented to our view and taken from us, leaving the thousand streams of our affections to flow back n an Aipine torrent upon our hearts We are born for higher destluy than that of earth. There is a realm, where the ralnbow never fades, where the stars will be spread out before us like the Islands that slumber on the ocean and where the beautiful beings which pass before us like shadows will star sickon. forever in our presence. In these bean-tiful thoughts we can all find much to be thankful for, even if a vacant chall is our home and the dark side of iid seems turned towards us. They will place a silver lining back of any cloud. As a matter of feet we idl have much to be thankful for.

In many ways Thanksgiving is one of our most delightful events. It comes at a time when the rigors of winter are not yet at hand. We have at our disposal all the varied prducts of the soil and the time for a senson of parof its most delightful features which has become quite general, is the gathering together under the old roof tree of all the scattered sons and daughters while visiting here, spen on this day. and brought forth an abundance! How Mecca Pennington spent Thursday full the gathering has been, and how full the gathering has been, and how great a storage we have! Truly our temporal biessings were never more full-our arms can carry no more; our greed could ask no more. And in view of ail this will it be difficult to have a true spirit of Thanksgiving? Not if we have a moat of consideration along-side of the mountains of blessings that crown this year. Let us not become so absorbed in appropriating so much that is good that we will have no sense of gratitude, no appreciation, no humbleness at receiving so much.

#### LETCHER COUNTY AND WHITESBURG.

#### What is Happening in this Rich Coal Territory of Kentucky.

WHITESHUHO, KY., Nov. 17.-One of the prettiest fall seasons known in recent years in Eastern Keatucky came to a close Friday when rain visited this section. Since then rain has been falling at intervals and at this time indications are that colder weather is scheduled to arrive, and possibly snow. With all the pretty weather only a few farmers of the county have completed

their corn gathering.
So far it looks as if the corn crop is turning out very poorly, not more than half a yield, while the quality is the poorest in several years, much of it having rotted on the stalk. The peo-ple predict that corn will be current at a dollar a bushel at once.

Following the arrest of Daniel Col-ns, aged 16, at Mayking as detailed ins, aged 16, at Mayking as detailed in this correspondence last week on the charge of breaking into the post-office and L. & N. ticket office at May-king Sunday, Nov. 7, officers went to Camp Branch creek west of here and arrested John Heury Neice, aged 17, a tough youth charged with the offense. Immediately after Niece's arrest he mads a complete confession detailing how he eatered, in broad daylight, a front window Sunday morning and secured the booty \$112, part of which was money order funds and part ticket of-fice money, \$35.00 of which was found on his person. Niece was brought here and his trial set down for Friday.Postoffice inspector V. It: Heck of Frank-fort came to the scene and assisted in the prosecution of young Neice, He was bound over to the IJ. S. Court at London, Nov. 23, and being unable to give bond was remanded to jail where he will remain until the 22 when he will be taken to Landon.

Seme of the finest roads ever con atructed in the mountains are now be-ing built between this city and Mouth of Colly creek three miles by Contractors J. J. Itrady and George M. Adams The construction of this model road-way came about through the constant, persistent efforts of County Judge Hery T. Day and the gallant members of the tetcher Fiscal Court. After making certain appropriations the State came to their rescue and put up the came to their rescue and put of the same amount of mouey which made it possible for the actual building of this road, an example for the people of Letcher county, Letcher is one of three mountain counties that is getting thus help from the State Why should there not be others? Letcher will continue abreast of conditions and get her share of the very best that's going. Judge Duy and the Fiscal Couri are to be congratulated. All honor to them.

The walls of the new Whitesburg Graded and High School building on College Hill are practically complete and as the pretty leviding bons up as if by magic we are made to believe that this will be one of the best school buildings in all the mountains of Kentucky. Franklin & Hrown the contractors are hustling gentlemen, and are doing everything possible, consistent with good work, to complete the outwith good work, to complete the out side work and get it covered ere the beginning of real bad weather, it looks like they are going to succeed beyond their expectations.

John L. Adams, aged about 60, a farmer of Colly creek in this county Saturday alght largels from starvation, it is said, as he had not tasted a morsel of food in over 20 days. # My Agent

By F. A. MITCHEL

I took my vacation in October in my runabottt.

One evening I was keeping an eye out fur a place to stay over when I came to a neat looking house-not a farmhouse. that looked as if it was or had been lubsbited by relined people. But what attracted my attention was a sign fastened to the gate bearing the words "Matrimoulai Agency." It seemed rather to me that they should be "Coarting Quarters." The place was certainly very cozy.

It is needless to add that I put up at the house. I was received by an elderly lady whose manner seemed quite too refined and courtly for an occupant of such a modest establishment. I asked her if she were the matrimonial agent, and she said she was not. Her daughter was trying to make something in that way. She never appeared to strangers nnless they called professionally. Being curious, I told the mother that I was ready for a wife whenever fate should throw one into my hands and, handling her a fee in advance, asked to see her daughter.

I expected to meet an angular old maid or widow. What was my surprise when the plumpest, rosiest little creature came into the room, smilling from her erebrows to the tip of her dimpled chin. She spicured to be shout seventeen years old, though she was twenty. Coming at once to business, she asked:

"Do you prefer a blond or a hrunette?

Looking into her blue eyes, I told her that I preferred blouds. "Hut," I sdd-"before coming to particulars 1 should like to talk with you about matrlmony. Do you recommend lt?"

"It would be absurd for me to recununend what is so important a part, If not the most important part, of nait struck me that this was evading

responsibility. I wondered at one se young being so diplomatic. "Du you vouch for the persons you

Introduce?" I usked. "Only for their respectability."

"Then you do not guarantee happl-

"I do not. The happiness of married persons depends only on themselves."
"Have you unde many matches?" "A number of persons I have brought

together have murried." "Have the unions usually turned out

impully?"
"I have not been in the business long enough to find out."

"You surely don't sail under faise relement,"

I described the appearance of the girl I should like to amrry, and she might have been the twin sister of the matrimonial agent. She declined to notice the fact that I had given her as a model, and nothing I could do to persuade her to drop her professional attitude had any effect upon her. Her. method was to give her business card to the man of the couple she proposed to hring together, with the name and address of the indy on it. But she never introduced a couple unless she had thoroughly investigated both partles and was satisfied that euch was in earnest in seeking a matrimoinal

Before leaving i gave her my name and address, with references to ce tain cronies of mine whom I could trust. I had no idea of having her introduce me to a possible wife. My object was to visit her sgaln, and I knew she would not receive me unless I satisfied her that my application was bona fide. Indeed, in one respect it was bons fide. I was willing to consider the agent herself as a possible wife-not that I had made up my mind to any such result, but it was pleasant

to contempinte. The matrimonial agency was not far distant from my home, and a fortnight after my return I ran out in my car to see the agent again. She informed me -which I already knew-that the reports of me were sutlsfactory and she was ready to give me a card to a young lady who was looking for a husband. I took the eard, but informed the agent that, being very busy, I might not soon deliver it. Not wishing that she should be delayed in recelving ber fee, I handed her another retainer. She took it in n businesslike manner and told me 1 was welcome to take my own time in the matter.

When I called again I told the agent that I should like several introductions. stating at the same time that I would choose a wife from among those in whom she was interested. She consented to this, and I teft her. During the winter I went to see her a number of times, always apologizing for not having called ou any of the young ladies whose addresses she had given me.

Toward spring, after brving called on the agent many times and upon none of those she had recommended, I went to see her for the last time as client. I told her that I had decided on n wife and it outy remained for the lady to decide on mc. She herself was the girl I wanted.

Without any expression of surprise she took out her portemounale and handed me the fees I had given her. "You are offended," I said.

consider that I have deceived you." "No," she said, with if smile, "I knew your intentions before you knew them yourself. I have accepted and saved these fees that you should have the wherewithal for an engagement

## At the Dispensary

a number of cities in the state there are dispensaries where these who do not feel well may go for an accurate medical inspection. pensuries are muintained particularly to afford facilities for the examination of consumptives or those who suspect themselves of having tuberculosis. The visiting nurses in their rounds of the city direct runduwn people to the dispensary for examination by the physicians.

The first step in the examination is to take the height and weight of the patient and to jenra many other simple facts about the case. This work is done by the nurse, sad the physician then makes a careful examination of the case. Where tuberculosis is found the patient is induced to return at regular intervals to the dispensary, and the nurses visit the patients as often as pos-

A dispensary at every county seat in Kentucky affording facilities for the careful examination of suspected consumptives under the supervision of experienced physicians and nurses would result in the discovery of thousands of cases at the early stage, when, with proper treatment, they could be restored to a rensonable degree of health. Consumptives ordinarily do not go to the physician till they are too far advanced for successful treatment. Consequently there should be visiting nurses in every county to search out the sick in their homes and hring them in touch with the physicians, either in dispensaries or at the doctor's office. About 5,000 Kentuckians die annually of tuberculosis. Not a single one of these deaths is necessary. But this death rate will keep up until there are proper provisions for finding consumptives In the early stage of the disease, and the dispensary, the visiting nurse and the health officer, who go out and look for the sick, comprise the most successful organization for the discovery and prevention of tubecniosis.

LMOST every one who wishes may have a sleeping porch. One may be hullt over the veranda of the home. if this situation is not suitable, two henvy poles and some cleans against the side of a honse will aupport the platform for the bed. If it is not convenient to make over the bedreom wludow into a door, the bed may be put right close to the window, and you can crawl through the window into the bed. Fresh air is the most important thing

In the trentment of tuberculosis. Consumptives all over the country are hullding sleoping porches so that they may sleep out of doors.

If fresh air is good for sick people it must also be good for healthy people. Those who have tried sleeping in the open on sleeping porches say they have never rested so well. Those who get up every morning in winter with headaches and feel generally out of sorts will always find that open windows in sleeping rooms will prevent that sort of feeling. Sleeping right out of doors on n porch is even better.

When you bulld your home plan for an open air sleeping porch just as you would for a kitchen. If you want one now, don't hold back thinking it will cost a lurge sum of mc..ey. This one was built for \$20.

Build your porch where it will be protected from strong winds. It is also good plan to provide it with curtains to keep out the rain and sun.

Halp For Consumptives. The State Tuberculosis Commission, Frankfort, Ky., will send to any physiclan, health officer or consumptive family, on request, a free copy of its new booklet on the home care of tuberculosis. This authoritative pamphlet is designed to aid and not supplant the physician. Its chapter on diet will prove especially helpful.

# Children at an Open Air School

OUISVIIILE has a school for those anaemic, randown children who are ordinarily subject to every form of disesse. Such children are greatly retarded in school, not only through their poor physical condition, but sise through frequent loss of time on account of sickness. Among those children also the germs of tuberchiosis may later find good soil.

This picture shows the warm aults and caps provided for the children, who are kept all day long in the open air. Windows on both sides of the schoolroom are kept continually open.

At noon the children are given a substantial meal at the school and then rest on cots for about an hour. Experience in Louisville and throughout the country shows that this com-

bination of fresh air, nuurishing food and rest under the supervision of a physician and a visiting nurse will produce remarkable results. The children uniformly show increased weight, better color, better spirits and greater activity. The school work is made subordinate to the care of the children's health, yet with fewer hours of instruction each day they make progress equal to that of normal children in the typical schoolroom. If fresh air is good for sick children it must also be good for hesithy children. The day is coming, according to Dr. Laadis of Cincinnati, when every schoolroom will be an opeu alr room.

You visit the pen you keep your pigs in, but do you visit the school to which you send your children? Do you really know whether it is clean and well ventilated? Does it have good water and clean closets? If your school is not clean and well ventilated, protest to the teachers and trustees till the mits are remedied.

CHILD, BURNED, DIED OF INJURIES.

The four-year old son of Mr. and Mrs. Blythe Robinson, who live in the narrows above town, was badiy harn-ed Tuesday and died from its injuries Tuesday nigirt.

It is said the little one was standing by the fire while Mrs. Robinson had cone out after coal. The child's dress aught from the grate, and it ran to the door screaming, and Mrs. Robin-son instantly put out the tinmes; but it appears that the child sucked one of tho tongues of flames down its throat, inflicting a fatal injury, which with other injuries caused the infant's dentir after much suffering.

#### FIRST M. E. CHURCH.

Rev. M. C. Reynolds, paster of the First Methodist church of Pikeville, announces that prospects for the raising of the church redemption fund are very bright, and that regular services are being held, including Sunday school, and ail are cordially invited to attend.

J. K. Thornbury, a young merchant of this city, was recently ordained as a minister of this church, and preached his first sermon to a considerable congregation last Sandsy morning.

Rev. Vernon Grizzie, who recently ake charge of the Pikeville circuit of this church, was cailed home to Chespenke, Ohio, by his futher and he left Tuesday to enter an Ohio school. This is to say the Pikeville circuit for the present is vacant, but will be tilled

within a few days.

Mr. Reynolds, pastor of the Pikeville church, has been interested in this church for many yesrs, and has done much for it in various ways.

#### MUSICALE.

Assisted by Miss Agnes Abbett, violineste, Miss Kathryn Freesc, of Louisa gave a vocal interpretation of a well selected programme at a musicale held at the M. E. Church, South, under the auspices of the Young Ladies' class of the Suaday school Tues day evening. She was accompanied a the piano by Gertrude M. Wilholt of this city. A large gathering was present and accorded the Misses Freese and Abhott a hearty ovation on their appearance.

Miss Freese is quite well known Pikeville and has been the pupil of some of the best musical instructors of this country, and has been eminently successful. Miss Abbott plays with unusual skill, notwithstanding her youth and her music was greatly enjoyed.

Another interesting feature of this weil arranged enterthinment was the recitations of Miss Mae Eliott, elocuthonist and art scholar of Pikeville. Her pieces were so well performed that she won repeated encores, and she delighted the audience with several interesting recitations.

#### FREIGHT WRECK.

A freight wreck resulting in the destruction of nine cars of coal and coke occurred two miles below Pikeville Wednesday at noon. This makes the second freight wreck that has occurred

two miles above Pikeville.

The late disaster took piace on tire curve just below the cut at the mouth of Cedar creek. The destruction in this smashup, hawever, was not so great as the first one. No cause can be found as yet, unless it be that the strength of the tracks was not sufficient to resist the pail of the large engine which was drawing the train. # A FEW FACTS ABOUT COLDS WORTH KNOWING.

The phrime "taking cold" lias iong been employed by the lalty to express a series of clustices taking place in the human system, supposedly due to direct exposure to caid; but modern cientific investigation has expioded this erroneous idea and proven beyond doubt that cold par se, is only an exciting factor and NOT the real came in the process. It is a well known fact that savinges and while men sajourning in rold elimites and ont of doors, mimost never suffer from codds, and that it is only nfter they return of the environ-ments of rivilization, where peo-

pie dwell in closed and tadly ventlisted ionses and freely rominingle with each other that t'alds become an Incident of frequency and great

Modern bacteriology has plainly pointed out the reason for this; That the direct cause of all colds is certain nacroscopid bodies called bacteria; or in plain words, germs.

it can be easily demonstrated that the upper Air Passages (Nose, Thront and Larynx's inditually horbor several varieties of these dis-ease producing organisms, chief among which is the dendly Prem-monia baccillas, and that they are spread from person to person by direct contact where crowds are sathered in badiy ventilisted lecture rooms, theatres, churches or formes. These germs may be perfectly dormant in the healthy air passages until incited to activity by some lowering of the individual's resistance, when, io- they break forth with increased violence and the so-called Cold resolts.

Whether this told will prove a simple catarrh of the nose and throst of but short duration and mild character, whether dread Paeumonia, with its shirp and fatid sting, shall be the sequence; or whetirer the blighting blast of the White Plague shall sit spectre-like upon its victin, no one can foretell, bence, line great importance of treating all colds, however mild, promptly mad energetically. In Urban populations the services of a skilled physician is slwsys within call, but in rural districts, distance and inclement weather often act together to forestall the doctor's itmely rid, so that valuable time is in this way lost. It was particularly for this latter class of sufferers that MEINHARDT'S GERMAN COUGH REMEDY was invented.

It is a pieasant and palatable composition of strictly pure and well selected drugs, each a power, but in this happy combination a porequ remedy to relieve coughs and colds. Trial will convince keptical of its great efficacy in relieving the aliments for which it was specifically intended by the Mnnufacturer. In all cases of acute rhintle farybeltis, tracheltis and bronchitis, MEINHARDT'S GERMAN COUGH REMEDY, taken according to directions on the label, will speedly give relief, and if persevered in, will, as a raie, completely restore to normal the diseased maccions membranes.

Except no others only the Genuine, it helped others. Will help you. Try  $\rm lt_1 = 25c.$
